SUMMARY

Computer Science Engineering undergraduate with a strong interest in software development, data structures, and emerging technologies. Hands-on experience in web development, mobile app design, machine learning projects, and IoT-based systems. Passionate about problem-solving, building user-focused applications, and continuous learning.

SKILLS

Programming Languages: C, C++, Python

Web & App Development: HTML, CSS, JavaScript, Mobile App Wireframing

Core Areas: Data Structures & Algorithms, Web Development, App Development, System Design (Learning)

Tools & Platforms: Figma, Canva, VS Code, Git, Firebase

PROJECTS

Cycle Rush Rental Bike Website

HTML, CSS, JavaScript

- Developed a fully responsive website for a campus-based cycle rental system.
- Implemented clean UI and user-friendly navigation for booking and information access.

CampPrepAI

AI-Powered Student Preparation Platform

- Built an AI-based platform for semester exam preparation for 1st to 4th year university students.
- Integrated personalized study recommendations, practice questions, and progress tracking features.
- Helped students improve academic performance through AI-driven learning support.

Credit Card Fraud Detection

Machine Learning

- Built a machine learning model for detecting fraudulent credit card transactions.
- Performed dataset analysis and documented findings in a detailed project report.

Automatic Door Opener

IoT

- Developed an IoT-based automatic door system using sensors for smart automation.
- Demonstrated real-world application of embedded systems and automation concepts.
